Problem Statement

Title: Task Management System

Design and develop a comprehensive portal for a task management system that digitizes manual processes, provides role-based access for administrators, staff, and users, automates workflows, generates analytical reports, sends real-time notifications, and integrates securely with institutional systems to improve operational efficiency, transparency, collaboration, and user experience.

Key Focus Areas

- Role-based access control for Administrators, Staff, and Users
- Digitization of manual task management processes
- Automated workflow management
- Analytical dashboards and report generation
- Real-time notifications and alerts
- Secure integration with institutional systems
